Ans.
Sept. 5.

Coutrelus House Hereford
July 1. 1845

My dear Sir

On paying through London I sent addressed to you to the care of Wiley & Putnam a MS copy of so much of my Scrophulariaceæ for the Prodromus as relates to N. American species – Mr Bentham copied out the greater part for me but at the last I was obliged to get it finished by a young man & had not time to read over his part but on looking over it seemed all right

The vol. will be out I suppose by Xmas
